Education

Indian Institute of Information Technology, Vadodara

Bachelor of Technology in Computer Science and Engineering

December 2021 – July 2025

Gujarat, India

Technical Skills

- Languages:** Java, JavaScript, TypeScript, Python
- Frontend:** React, React Native, TypeScript, Redux Toolkit, Vite, Tailwind CSS, Retool
- Backend:** Spring Boot, Spring Security, Node.js, Express.js, REST APIs, FastAPI, JWT, Microservices, API Design
- AI & Automation:** OpenAI API, LLM workflows, RAG pipelines, Playwright, PyAutoGUI, AI Voice Agents
- Databases:** MongoDB, PostgreSQL, MySQL
- Cloud & DevOps:** AWS (EC2, S3, ECR, Amplify, Auto Scaling), SQS, Docker, CI/CD, Postman, Git, GitHub
- Integrations:** Twilio, Deepgram, Razorpay, FHIR APIs, Firebase
- Concepts:** DSA, OOP, System Design, Scalable Backend Systems, JUnit, Mocha

Work Experience

Devsthan

Bengaluru

Software Engineer I

July 2025 – Present

- Delivered a religious full-stack mobile and web platform using React, React Native, Spring Boot, and MongoDB, serving **10K+ users** and processing **50K+ orders** with production-grade stability.
- Architected and secured **30+** REST APIs for Orders, Payments, and Subscriptions using Spring Security and JWT, applying system design principles and design patterns, enabling **Rs.2Cr+** in annual Razorpay transactions.
- Improved web and mobile performance using Redux Toolkit and code-splitting, achieving **0.19%** crash rate and **0.02%** ANR rate, wrote unit tests (JUnit/Jest) to validate critical flows and support pre-production QA.
- Shipped **12+ Retool apps** covering order management, event catalogs, asset tracking, OPS workflows, and data management, enabling non-technical stakeholders to monitor KPIs and manage platform data without engineering intervention.

Software Engineering Intern

January 2025 – June 2025

- Engineered Java-based deep-linking and secure short-link service with token expiry, routing logic, and usage analytics, applying software engineering best practices and design patterns for scalable in-app navigation.
- Integrated Firebase Cloud Messaging (FCM), along with Google Analytics and Facebook Pixel, to enable real-time notifications, user tracking, and engagement optimization across **10K+** active users.
- Developed a React Native Virtual Darshan module with real-time interactions like bell ringing, flower offerings, and ritual triggers, handling **8+ event types** and collaborating via peer code reviews and Agile sprints to deliver front-end features.

NextgenApply

Remote

Software Engineer (Independent Consultant)

July 2025 – August 2025

- Designed a React-based web platform and dashboard with RBAC, application tracking, analytics, and design systems for consistent UI/UX across workflows and metrics.
- Orchestrated scalable backend pipelines using Python and OpenAI APIs to build data solutions for extraction and automation in job processing workflows, enabling high-throughput processing and improving ATS-based matching accuracy (**~90%**).
- Implemented CI/CD pipelines and AWS services, designing scalable cloud architecture with EC2 Auto Scaling, while ensuring operational excellence through system reliability, monitoring, and cost optimization (70% reduction in infra and API costs).

GPT Innovations, Inc

Remote

Full Stack Developer Intern

February 2024 – December 2024

- Delivered full-stack web features across the Software Development Lifecycle (SDLC), from requirements gathering and design through development, peer review, QA, and production release, reducing form submission time by **66.67%**
- Built AI-driven healthcare systems including QuickScribe (**95%** efficiency gain), AI Voice Agent using Twilio and Deepgram for real-time patient interaction, FHIR/MeldRx integrations, and automated eligibility verification bots using PyAutoGUI, reducing manual operational workload.

Projects

BulkBuzz

React.js, Bootstrap, SQL, MUI, Twilio APIs, REST APIs

- Engineered an SMS broadcasting platform using Twilio API to manage communication across **1000+** numbers.
- Implemented campaign management, recipient filtering, and real-time delivery tracking for improved outreach efficiency.

Weather Forecasting System

Node.js, Arduino, ReactJS, LSTM

- Developed an IoT weather forecasting platform using NodeMCU, Node.js, ReactJS, LSTM and environmental sensors for real-time data acquisition and monitoring.
- Designed REST APIs and an interactive ReactJS dashboard to visualize live sensor data and predictive analytics in real time.

Achievements

- Mentored **20+** students in backend development at SSIP Gujarat, guiding them in system design fundamentals, APIs, JavaScript, and practical web engineering concepts.
